

Up in The Clouds

51 villas in the foothills of Nandi Hills

Investor presentation · A Triton Group project

Project at a glance

Developer	Location	Product	Land extent
Triton Group	Foothills of Nandi Hills	Plot plus a villa built by us	3.97 acres

Plots take 50.7% of the land. Source: Triton Group site plan R1

Why Nandi Hills

~60 km

from central Bengaluru, in
Chikkaballapur district

20 min

drive from Kempegowda International
Airport to the JW Marriott Prestige
Golfshire resort

301

rooms at the resort, opened March 2022
within a 275 acre golf community

A global hospitality brand has already chosen this micro-market.

Infrastructure around Nandi Hills

Namma Metro Blue Line

72% built

58 km and 30 stations from Silk Board to the airport. Full line targeted for end 2027. It ends at the airport, not at Nandi Hills.

Satellite Town Ring Road

80 km open

Dobbaspet to Hoskote opened in March 2024. Other sections are expected in 2026 to 27 and one phase is on hold.

Foxconn at Devanahalli

About 35%

Anarock reports prices near Devanahalli up about 35% since Foxconn arrived. The effect at Nandi Hills may be smaller.

Nandi Hills ropeway

Awaiting approval

A ₹93 crore plan. As of July 2026 it needs Union environment approval, has no opening date and faces local opposition.

Price growth: what independent data says

10–14%

a year: plot price growth over 3 to 5 years in the airport corridor (PropNewz estimate)

+46%

Devanahalli built-up prices from 2016 to 2023, about 5.6% a year (Anarock)

1.6–2.0%

estimated gross rental yield on plot plus construction near Devanahalli (PropNewz)

These are regional estimates, not results for this project. They range from about 5% to 14% a year depending on asset type and period, so we plan for appreciation over a long hold and promise no return.

The villa

Item	Detail
Plots	51
Plot size	Average about 1,720 sq ft. Most common 30 × 50 ft
Villa	Built by us on each plot or upto them
Built-up area	3,800 sq ft
Configuration	4 and 5 BHK
Floors	3 floors

Artist impression, for illustration only

Master plan

Total land, 172,748 sq ft

3.97 acres

How the land is used

Use	Sq ft	Share
51 plots	87,645	50.7%
Roads	61,798	35.8%
2 parks	17,763	10.3%
Kharaab area	5,542	3.2%

Plot sizes, average about 1,720 sq ft

1,200 to 2,600 sq ft

What land costs in the region

Most common plot, 1,500 sq ft

₹52.5 lakh to ₹90 lakh

at ₹3,500 to ₹6,000 per sq ft, the range quoted for Nandi Hills foothill plots in April 2026. Land only, before construction.

Average plot, about 1,720 sq ft

₹60 lakh to ₹1.03 crore

at the same ₹3,500 to ₹6,000 per sq ft. Land only, before construction.

These are regional land benchmarks, not our prices.

Risks and how we address them

Approvals and the hill's ecology

Activists and courts have scrutinised building near Nandi Hills, including the ropeway.

Our approach: every approval document is shared for checking before any booking.

Infrastructure timing

The ropeway awaits approval, the metro stops at the airport and the ring road is partly built.

Our approach: the case rests on location and product, with no single project assumed.

Price growth is not guaranteed

Independent estimates run from about 5% to 14% a year and are not specific to this project.

Our approach: no return is assured. Compare estimates and take independent advice.

Low rental income

Gross rental yield near Devanahalli is estimated at only 1.6% to 2.0%.

Our approach: treat this as a long hold for appreciation, with rent as a bonus.

Next steps
